

WATER TESTING PROGRAM

DRINKING WATER

This water source is part of the district's water testing program and is designated for drinking.

**2-MINUTE
MORNING FLUSH**

This water source is part of the district's water testing program and is designated for drinking. It is flushed by staff once in the morning for 2 minutes to ensure water quality.

NOT FOR DRINKING

This water source is not included in the district's water testing program and should not be used for drinking or food preparation.

Use **cold tap water only** for drinking and/or food preparation.

Hot water can dissolve contaminants more quickly and may carry particles from corroded pipes or metallic parts in hot water systems.
